Understanding Cancer Prognosis

What is the likely course of my disease? What do survival statistics mean for me? How does cancer affect my plans for the future? A new NCI video series has insights about these and other prognosis questions from three cancer patients and their doctor; a related fact sheet provides additional details.

NCI-Designated Cancer Centers

NCI-designated cancer centers are at the forefront of NCI-supported efforts at universities and cancer research centers across the United States that are developing and translating scientific knowledge from promising laboratory discoveries into new treatments for cancer patients.

▶ Find an NCI-Designated Cancer Center

NCI-designated cancer centers deliver cutting-edge cancer treatments to patients in communities across the United States. Find a center near you and learn about its patient services and research capabilities. [more >](#)

▶ NCI Cancer Centers Highlights

Throughout their history, the NCI-designated cancer centers have contributed to extraordinary advances in our understanding of cancer

OUR MISSION: The BBRB's mission is to ensure that human specimens available for cancer research are of the highest quality.

The BBRB is responsible for developing a common biorepository infrastructure that promotes resource sharing and team science, in order to facilitate multi-institutional, high throughput genomic and proteomic studies.

NCI Dictionary Widget

- Copy this code to add the NCI Dictionary of Cancer Terms widget to your website. You can adjust the width of the widget by changing the bolded number below. For best results, select a width between 230px and 400px.
 - `<div style="width:230px;"><script language="javascript" type="text/javascript" src="http://www.cancer.gov/publishedcontent/Js/TermDictionaryWidgetEnglish.js"></script></div>`

AccrualNet

The screenshot shows a web browser window with the URL <https://accrualnet.cancer.gov/>. The page header includes the National Cancer Institute logo and the text "at the National Institutes of Health | www.cancer.gov". The main heading is "AccrualNet™" with the subtitle "STRATEGIES, TOOLS AND RESOURCES TO SUPPORT ACCRUAL TO CLINICAL TRIALS". Navigation links include "SIGN IN", "REGISTER", and a "SEARCH" button. A horizontal menu contains "PROTOCOL ACCRUAL LIFECYCLE", "COMMUNITIES", "LITERATURE & TOOLS", and "EDUCATION & TRAINING". The main content area features a green header for "PROTOCOL ACCRUAL LIFECYCLE" and a circular diagram with five stages: DEVELOPING, SELECTING, RECRUITING, IMPLEMENTING, and EVALUATING. Below the diagram are three buttons: "Protocol Accrual Lifecycle", "Communities and Conversations", and "Education and Training".

PROTOCOL ACCRUAL LIFECYCLE

Most clinical trials follow a sequence—from developing a protocol through recruiting participants to closing the trial and analyzing the results. We think of this as the protocol's life cycle. At every stage of the lifecycle, accrual matters.

AccrualNet™ can help by providing accrual strategies for you to consider at each stage, and carefully selected resources and tools for you to use. [Learn More.](#)
